OBJECTIVES:
Understand how marijuana use during pregnancy can affect pregnancy outcomes.
Understand the impact of smoking marijuana on infants and childhood development.
Identify legal ramifications of using marijuana during pregnancy in the state of Colorado.

“Fetal DNA in Maternal Blood: Where We’ve Been and Where We’re Going” – Richard Porreco, MD
OBJECTIVES:
Review brief history of fetal maternal traffic of cells and cfDNA.
Discuss the work up for neck masses.
Review the differential diagnosis for neck masses in children.

“Minimally Invasive Approaches for Everything from Hernias to Complex Congenital Anomalies; Eliminating the Morbidity and Scars of Surgical Procedures in Children” – Steven Rothenberg, MD
OBJECTIVES:
Understand what minimally invasive surgery (MIS) is.
Identify when common pediatric surgical problems can be treated using an MIS approach.
Discuss the incidence and epidemiology of sudden cardiac death in young athletes.
Discuss long term respiratory outcomes of children with bronchopulmonary dysplasia.

“Pediatric Urologic Emergencies” – Job Chacko, MD
OBJECTIVES:
Review patient presentation of a pediatric urologic emergency.
List indications for pediatric urologic consultation.
Understand the concept of “new BPD” vs. “old BPD”.
Identify factors associated with weaning of long term supplemental oxygen therapy.
Describe long term respiratory outcomes of children with bronchopulmonary dysplasia.

“Pediatric Oncology: Potpourri of Practical Issues for the Primary Care Provider” – Julie Zimbelman, MD
OBJECTIVES:
Identify common presentations and recommended evaluations of pediatric malignancies, including the red flags of common general pediatric complaints.
Discuss the work up and return to play/clearance guidelines.

“Therapeutic Endoscopy” – Ted Stathos, MD
OBJECTIVES:
Understand the physiologic adaptions seen in the athlete’s heart and their impact on screening.
Explain how we manage the child’s Injured Hand.
Understand the complications of unrecognized or unrepaired coarctation.

Coarctation of the Aorta” – Steven Leonard, MD and Michael Pettersen, MD
OBJECTIVES:
Recognize the presentation of coarctation of the aorta in a neonatal patient.
Understand the surgical coarctation repair and potential complications.

“Red Flags for Pediatricians” – Renee Osterdock, MD
OBJECTIVES:
Explain key neurosurgical observations in newborns.
Recognize abnormalities in the newborn that require neurosurgical evaluation.
Understand the long term treatment and outcomes for congenital abnormalities.

“Is It Broken or Just Fractured? What Not to Miss in Evaluating the Child’s Injured Hand” – Laurel Benson, MD
OBJECTIVES:
Understand the concept of “new BPD” vs. “old BPD”.
Identify factors associated with weaning of long term supplemental oxygen therapy.
Describe long term respiratory outcomes of children with bronchopulmonary dysplasia.

“Bronchopulmonary Dysplasia: Beyond the NICU” – Franziska Rosser, MD
OBJECTIVES:
Understand the concept of “new BPD” vs. “old BPD”.
Identify factors associated with weaning of long term supplemental oxygen therapy.
Describe long term respiratory outcomes of children with bronchopulmonary dysplasia.

“Common Headaches in Pediatrics” – Ramon Cuevas, MD
OBJECTIVES:
Discuss the work up for neck masses.
Discuss the work up for neck masses.
Discuss the work up for neck masses.

“Evaluation and Management of Pediatric Concussion” – Sue Kirelik, MD
OBJECTIVES:
Identify injuries that are easily managed in the primary care setting vs. those that require a specialist referral.

Please join us following the educational seminar at Coors Field for the Colorado Rockies vs. San Diego Padres at 6:10 p.m.
Tickets are available on a first come, first serve basis. One ticket per attendee.
